Jody,

Here is the list you requested. Let me know if you need anything else.

Thanks,

Adam

Adam: Carolyn needs a query for Walgreens. She needs a list of all products that have a DEA Base Code. Give her the following:

Vendor #

Vendor Name

NDC

CIN

DEA BASE Code

Item Desc

Activity Status

Only give non retired items.

Let me know if you think you can have it to her by the end of the day Friday, or if you think you need more time based on your workload.

Carolyn: I assumed that you need both active and inactive items because there could still be some inventory on some discontinued items. Let us know your thoughts regarding item status. Jody

Jody - in order to get data on usage from Walgreens, we need to provide them a list of all drugs we have base codes assigned to so they can determine volumes of those families of drugs so we can set appropriate thresholds for the DEA limiter program.

Can we have someone produce a spreadsheet of all our products (and CINs) with NDC numbers and assigned base codes for all items we have a base code assigned to so we can provide to Walgreens?

Please let me know the timing on this effort

Thanks for your help.

Carolyn

I assume Steve is talking about the 1012 families of drugs. Who can best provide these numbers?
Thx-Mark

Mark,

I am going to need the NDC's by families. For the chains.

Steve

Subject: RE: Anti-Diversion discussion to include Walgreens' loss prevention group

Good Morning Everyone,

I spoke to Azra this week and there are a few additional questions that she would like to have answered:

- * What format will the daily "80% of threshold" report be in? Excel, Word, PDF?
- * Can the thresholds be set based on their specific ordering patterns? They feel strongly that their ordering patterns are different than those of other stores
- * Can a store's threshold ever be adjusted down? (Potentially as a result of snowbird customers heading south for the winter)

She has also requested their last 12 months of control drug purchase history so that they have the same data that we are using for a baseline. Is there an item list available that I can use to pull this information?

Thanks for your help and have a good day!

Danielle

After talking with QRA they would like to know as much as possible, even if we have to sign a confidentiality agreement with them.

FYI - I would suggest that we look at having a discussion (on the next call) about a confidentiality agreement between CAH and WAGS regarding their loss prevention. I believe the DEA will look favorably on situations where companies work together to prevent/address diversion.

Steve - your thoughts on how we approach this? Same situation as we discussed with CVS on Friday. Do Mone/Hartman have a QRA to QRA approach in line to address this?

Thanks David.

In talking to Azra this morning she said that their loss prevention group guards quite closely exactly what they do to monitor their stores (they feel it's proprietary) so the conversation will most likely be more "what else should we consider" vs "what are you doing"

Safe travels
Danielle
